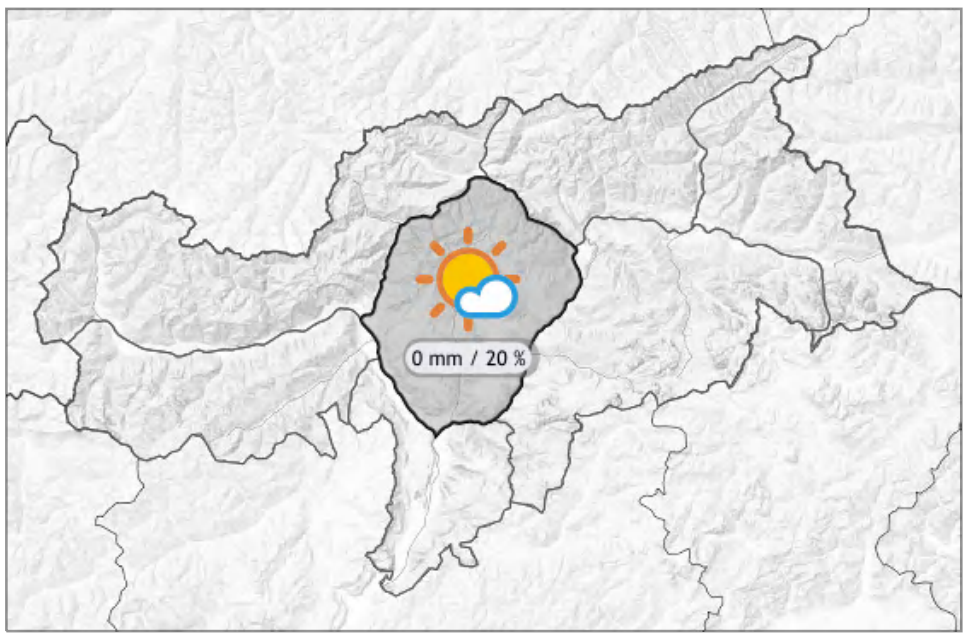
Mountain weather bulletin
Sarntal Alps - 23.11.2026

Forecast for today, 23.11.2026
Variable cloudy, windy

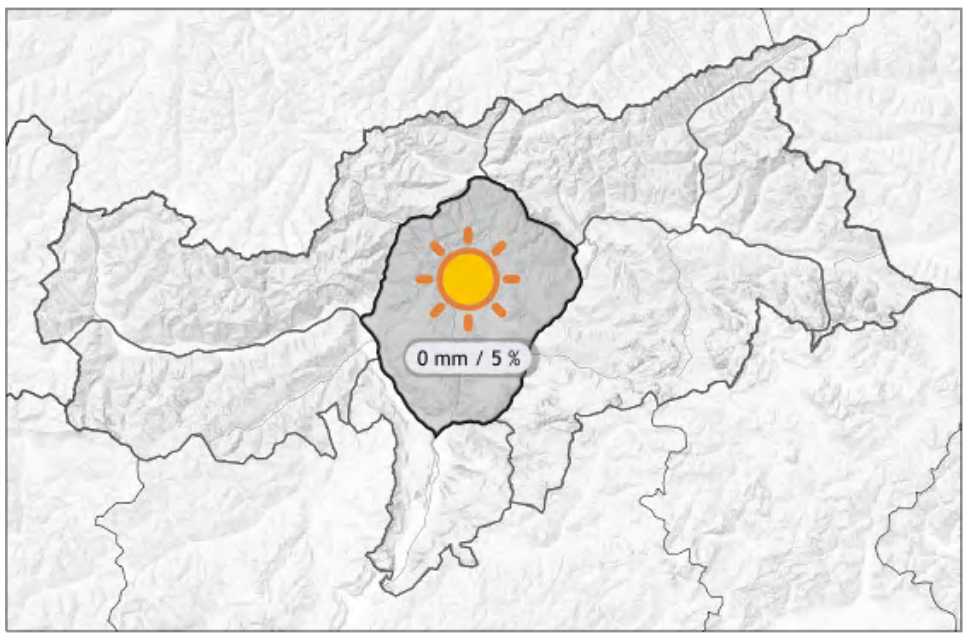


Reliability: 70 %

Precipitation: 0 mm
Precipitation probability: 20 %
Zero degree level: 1200 m
Snow level: 800 m

A northwesterly flow at high altitudes will bring slightly drier air to the Alpine region. Foehn conditions will develop on the southern side of the Alps. Visibility will be reduced on the mountains along the main Alpine ridge and in the western mountain ranges, with light snowfall possible at times. Elsewhere, the clouds will break up during the day, with the sunniest conditions expected in the Dolomites. Strong northwesterly winds will blow.

Forecast for tomorrow, 24.11.2026
Often sunny



Reliability: 80 %

Precipitation: 0 mm
Precipitation probability: 5 %
Zero degree level: 700 m
Snow level: 400 m

A temporary high-pressure system will ensure stable weather conditions. Initially, a few clouds will be present, especially in the western mountain ranges, while elsewhere sunny conditions will prevail. During the afternoon, skies will become increasingly cloudy from the southwest.
