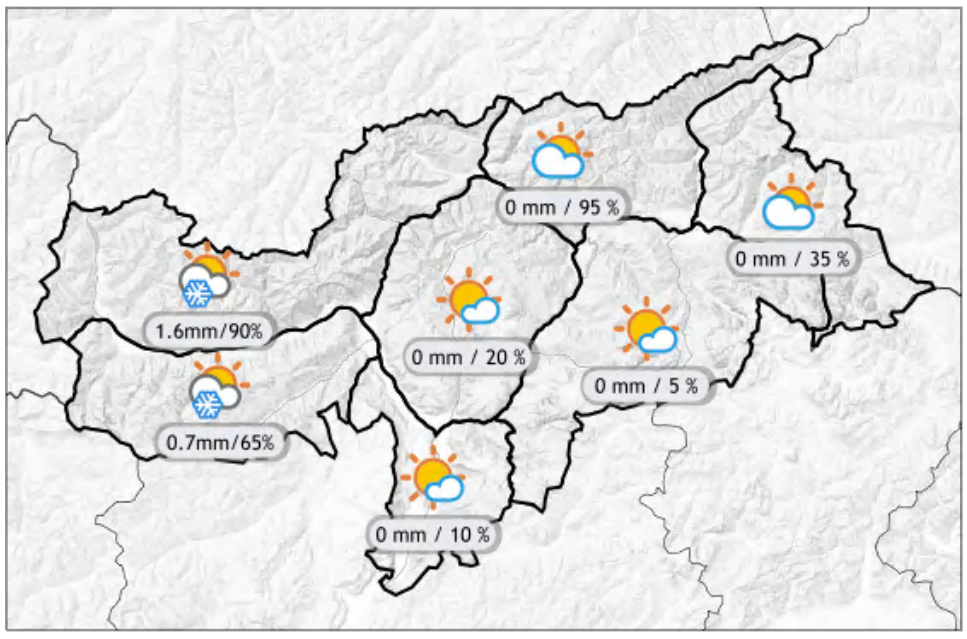
Mountain weather bulletin - Overview
Monday, 23.11.2026

Forecast for today, 23.11.2026
Variable cloudy, windy



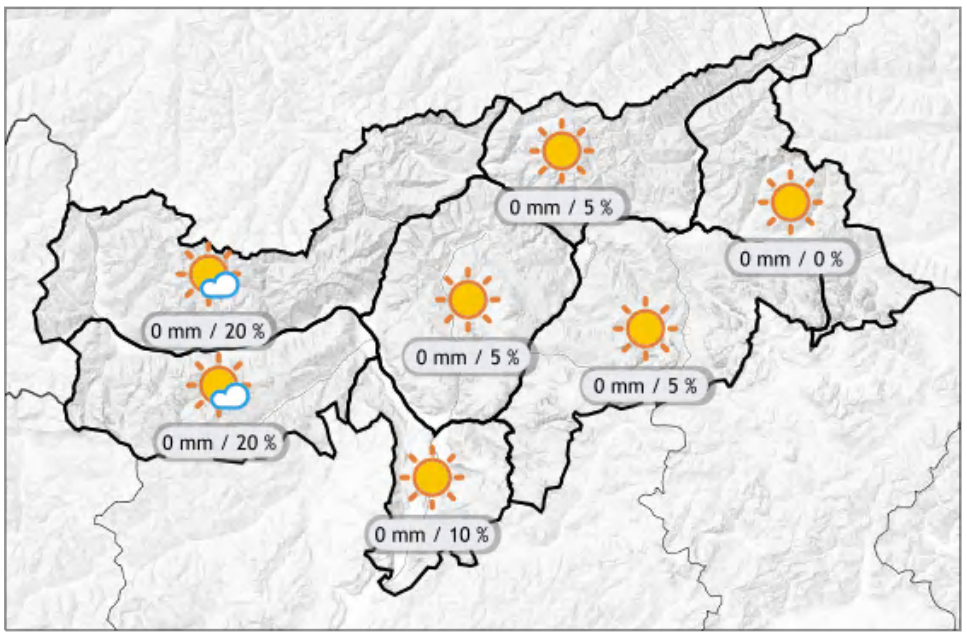
Reliability: 70 %

General weather situation
A northwesterly flow at high altitudes will bring slightly drier air to the Alpine region. Foehn conditions will develop on the southern side of the Alps.

Forecast for today
Visibility will be reduced on the mountains along the main Alpine ridge and in the western mountain ranges, with light snowfall possible at times. Elsewhere, the clouds will break up during the day, with the sunniest conditions expected in the Dolomites. Strong northwesterly winds will blow.

	Sun	Sunrise	Sunset
		07:28	16:36
	Moon	**Moonrise**	**Moonset**
		15:20	06:02

Forecast for tomorrow, 24.11.2026
Often sunny



Reliability: 80 %

General weather situation
A temporary high-pressure system will ensure stable weather conditions.

Forecast for tomorrow
Initially, a few clouds will be present, especially in the western mountain ranges, while elsewhere sunny conditions will prevail. During the afternoon, skies will become increasingly cloudy from the southwest.

	Sun	Sunrise	Sunset
		07:29	16:35
	Moon	**Moonrise**	**Moonset**
		15:59	07:27
